Reinstating an Ancient Method of Health Care

Do you know how dreams work? We do, [books](#) full explaining uses and [links to interpretations](#). Dreams are the Creator's Living Word to us (Num 12:6). Research shows they provide a spectrum of hints and answers for our benefit and success, in every area of life, even in diverse topics like war, UFOs, and astronomical events. A few successes you might know about: Edison, Einstein, Bell, Tesla, Franklin, Darwin, scores of inspired composers, artists and authors, Nobel Prize winners plus countless health solutions from distant past to now.

With that in mind we provide a preemptive plan of **Disaster & Health Assurance**
Based on your and your children's dreams.

Can we preempt 100% of negative events? Not unless 100% of your dreams are written down, yet even one a night is often enough to protect you from harm or danger, or inspire creative pursuits.

Few people know the benefit of their dreams, and think they are weird or a laughable joke so they ignore and waste dreams' many helpful hints.

So do you want advance notification of disasters or health problems that are developing before they cause you grief? What's it worth to avoid cancer, diabetes, Alzheimer's or AIDS? Alzheimer's afflicts

15% now, at a cost of \$2000+/mo for an **average** of 10+ years, or more than a **quarter million dollars** per life 'lost' to its debilitation. Alzheimer's 2007 care is \$315 billion a year world wide, and rising very rapidly. It is the most costly ailment. Medical cures are non-existent yet that profession 2300 years ago began by using our method, and lost it.

[BestDoctors.com](#) said the success rate for medical practitioners is only 55%, and, in the USA, **costly** with the average 'saved' as being around \$28,000 per health event. Visionary Edgar Cayce had 99% success; his low-cost remedies avoided invasive procedures, years before even antibiotics existed.

In North America many [deaths](#) occur per year to medical mistakes, wrong diagnoses, wrong meds etc. What would keeping your spouse or children from untimely death be worth? Would you want the chance to stop possible suicides or teen pregnancy? Those alerts exist in dreams. We have proof. It all leads to longer more productive and creative lives.

What big area makes well-recorded dreams use less than perfect? Time and timing. Analogies or symbols missed or not understood are second.

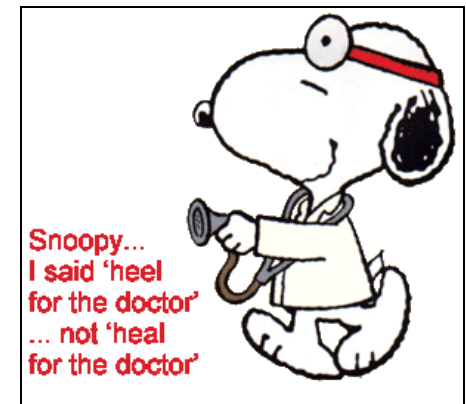

What if you found that recording the content of dreams for children hugely increased their literacy? Would you act to get the benefits the exercise provides? See [firstspells.com](#) & [godofdreams.com](#) (this one pays preteens for 'disaster' dreams).

Disaster and accident assurance: This century a half million lives have been lost in Haiti and Indonesia. That converts to 10 billion dollars at \$20,000/life. Maybe you want to know if unseasonal snow, flood, tornado, volcano or other disaster will occur, or if a vehicle needs repairs to keep it/you from an accident? Forewarned is forearmed. Waste it and suffer, or use it for your benefit. Dreams are free, interpreting them helps assure your life and success.

Our service has no equal. DrCrunch.com is run by a non-profit. Phone S-F 9-9, 888-Z-CRUNCH or 306-473-2665 in Willow Bunch. Or write Box 10, Willow Bunch, SK, Canada, S0H 4K0

More dreams are recalled in times of stress and disaster. Let's harness that in Haiti so everyone can benefit. What losses can we afford? Better yet will what we pay cut those losses to a fraction? Health care here already costs \$567/mo/person, so is 15% more or \$88/mo/person or \$2500/yr/family a fair price for our preemptive services, which make some health services redundant? Would you sooner take our 35 hour, [week long course](#) for \$495 and learn to do it? Our course provides trials into 'miraculous' therapies used 2000 years ago to heal ailments.

Let's make it easy, and fun. We'll take 'trade-ins' for our service, a pickup you don't use, organic crops, or a farm implement you want to sell. We'll credit its sold value from [www.buyorsell.it](#) and provide tokens for an online raffle on [www.tobet.me](#) to preempt future losses in disasters or to create new technologies. Extra funds pay Haitian orphanages to get more 'disaster' dream input from orphans to help preempt future loss of lives or bad choices.

Benefits:

Lower taxes (preempting health care cuts costs)
Less long term care, avoid debilitations & diseases
Better health using simpler non-invasive solutions
Less use of meds, fewer side effects and allergies
Longer healthier lives, more health solutions
Preemptive care often based on dietary changes
Fewer lives lost to disasters, accidents, bad choices
Help others as you help yourself and family
